

## DECLARATION OF WARRANTY

The dimensions of the fittings and related components made by HAUTAU GmbH are capable of withstanding the stresses to be expected according to the intended use specified in the product information.

In accordance with its Terms and Conditions, HAUTAU GmbH grants a warranty period of 24 months. In addition, HAUTAU GmbH guarantees the life and proper function of its products for a period of 2 years subject to the following conditions.

HAUTAU GmbH guarantees that neither the load-bearing components used for the fittings and related parts nor the load-bearing components of subsequent parts will break.

This guarantee applies provided that the fittings have been professionally installed following our applicable installation instructions, are operated in accordance with our operating instructions, and have been verifiably serviced by a specialist according to our maintenance specifications. In addition, the fittings are selected by the processing plant according to the wear to be expected under normal conditions. Only fittings licensed and approved by HAUTAU GmbH may be installed.

Mixing or re-using components in other places will release us from any liability. Moving parts must be verifiably subjected to regular maintenance by a specialist. Components relevant to safety must be checked for wear and a tight fit on a regular basis. The intervals for cleaning, care, and maintenance vary with the extent of stress to which the components are exposed in the operating environment and are described in the maintenance and operating manual.

The warranty does not apply to damages caused by natural wear, force, improper handling/assembly, maintenance or unauthorized modifications as well as chemical, electrochemical and electrical impact. Also not covered by this warranty are damages caused by extreme weather conditions or the fact that parts were installed in environments susceptible to corrosion, e.g. damp locations or regions with high humidity or in the vicinity of bodies of water.

The warranty shall commence with the date of shipment. The warranty period shall not be extended should any repairs or replacements become necessary. Before making any repairs or replacing a component, we must be given an opportunity to inspect and examine the component in question. We must be notified about any damages without delay.

In case of a warranty claim, we will replace the defective parts at no charge. No other reimbursements of costs shall apply. HAUTAU GmbH shall not be responsible for any consequential damage due to defects that have been corrected on the basis of this declaration of warranty.

The warranty of 2+2 years does not apply to any electrical components or electric drives.
